# Respect

for the

environment

## Green technologies

 We choose 100% natural materials with an excellent performance from innovative processes such as sintering technology which allows ceramic stone to be created without using adhesives or polluting substances. We have adopted the use of Greenguard-certified organic paint that ensures low emissions and better air quality in home environments.

## Innovation

 We are always on the lookout for unique material and raw materials allowing us to offer the market high-quality products with a signature design. We have introduced an artificial intelligence system that plans production, maximizes productivity and facilitates logistics and sorting operations by reducing waste significantly.

## Product durability

 We design products that last longer to reduce waste and offer high quality standards.

## Eco-friendly materials

 We use glass and aluminium, infinitely recyclable materials to develop hard-wearing products with a strong visual impact, and PET for safe surfaces without toxic emissions either during production or use.

## Internal logistics

 We have optimised all internal company logistics to reduce energy wastage and CO<sub>2</sub> production to a minimum.

## Transport

 We organise shipments by optimising space and delivery routes to reduce CO<sub>2</sub> emissions on the planet.

## Green-living attitude

 We have eliminated the use of plastic in our offices and production department by installing water dispensers, and recover all the waste we produce through our industrial activities.

## Special projects

 We are joining the Furniture Pact, an industry-led, collaborative initiative that promotes and upholds common sustainability goals for the furniture sector in Italy, including the social and environmental impact of its value chain.

## Space optimisation

 We reduce building material waste by optimising spaces with our own furniture solutions, perfectly adaptable to different architectures thanks to their extensive modularity and customisation.

## Energy diagnosis

 We constantly monitor our total consumption and define systemic improvement actions to optimise our energy impact.

## UNI EN ISO 14001

 We have certified our environmental management system in compliance with standard UNI EN ISO 14001.

## Packaging

 We use only boxes made of recycled paper, gradually reducing the use of plastic, to be completely replaced with eco-friendly materials.

## Circular economy

 We produce melamine-faced structures and doors consisting of ecological panels produced by FSC® certified suppliers who use pre- and post-consumer wood, which is given a second life thanks to a self-perpetuating circular economy, without impacting our existing forests.

# Rispetto dell'ambiente

## Tecnologie green

Scegliamo materiali naturali al 100% resi straordinari da processi innovativi come la tecnologia di sinterizzazione che permette di creare pietre ceramiche senza l'utilizzo di colle e sostanze inquinanti. Abbiamo adottato l'utilizzo di vernici bio certificate Greenguard che garantiscono basse emissioni e una migliore qualità dell'aria negli ambienti domestici.

## Innovazione

Siamo sempre alla ricerca di materiali e materie prime uniche che ci permettono di proporre sul mercato prodotti di alta qualità dal design distintivo. Abbiamo introdotto un sistema di intelligenza artificiale che pianifica la produzione, massimizza la produttività e facilita le operazioni di logistica e smistamento riducendo, in maniera significativa, gli sprechi.

## Durabilità dei prodotti

Progettiamo prodotti con una maggiore vita utile per ridurre i rifiuti e offrire alti standard qualitativi.

## Materiali eco-friendly

Utilizziamo vetro e alluminio, riciclabili all'infinito per realizzare prodotti resistenti e di grande impatto estetico, e PET per superfici sicure che non rilasciano alcuna emissione tossica durante il ciclo di produzione e utilizzo.

## Logistica interna

Abbiamo ottimizzato tutte le movimentazioni all'interno dell'azienda per ridurre al minimo lo spreco di risorse energetiche e la produzione di CO<sub>2</sub>.

## Trasporto

Organizziamo le spedizioni ottimizzando gli spazi e i percorsi delle consegne per ridurre le emissioni di CO<sub>2</sub> sul pianeta.

## Attitudine green-living

Abbiamo azzerato l'utilizzo della plastica negli uffici e nella produzione installando distributori d'acqua e recuperiamo tutti i rifiuti che produciamo con la nostra attività industriale.

## Progetti speciali

Aderiamo al Furniture Pact, un'iniziativa collettiva della filiera italiana dell'arredo. I membri promuovono obiettivi comuni di sostenibilità, coinvolgendo l'intera catena del valore, e hanno sottoscritto impegni ambiziosi ma concreti per ridurre il proprio impatto sull'ambiente e sulle persone.

## Ottimizzazione degli spazi

Riduciamo lo spreco dei materiali da costruzione ottimizzando gli spazi con le nostre soluzioni di arredo che si adattano alle diverse architetture grazie alla loro ampia modularità e personalizzazione.

## Diagnosi energetica

Monitoriamo costantemente i consumi totali e definiamo azioni di miglioramento sistemico per ottimizzare il nostro impatto energetico.

## UNI EN ISO 14001

Abbiamo certificato il nostro sistema di gestione ambientale in conformità agli standard alla norma UNI EN ISO 14001.

## Imballaggi

Impieghiamo solo cartoni realizzati con carta riciclata, riducendo progressivamente l'uso della plastica per sostituirla completamente con materiali green.

## Economia circolare

Produciamo strutture e ante in nobilitato costituite da pannelli ecologici provenienti da fornitori certificati FSC® che utilizzano legno pre e post-consumo a cui viene data una seconda vita in virtù di un'economia circolare che si autoalimenta, senza andare a intaccare il nostro patrimonio forestale.

# Go, il colore si struttura

**Il colore si struttura e cambia il nostro modo di guardare lo spazio; sottolinea i volumi, si compiace di essere notato.**

Colour structures itself and alters how we see the space; it highlights volumes and delights in being noticed.

El color se estructura y cambia nuestra forma de ver el espacio; acentúa los volúmenes, se deleita haciéndose notar.

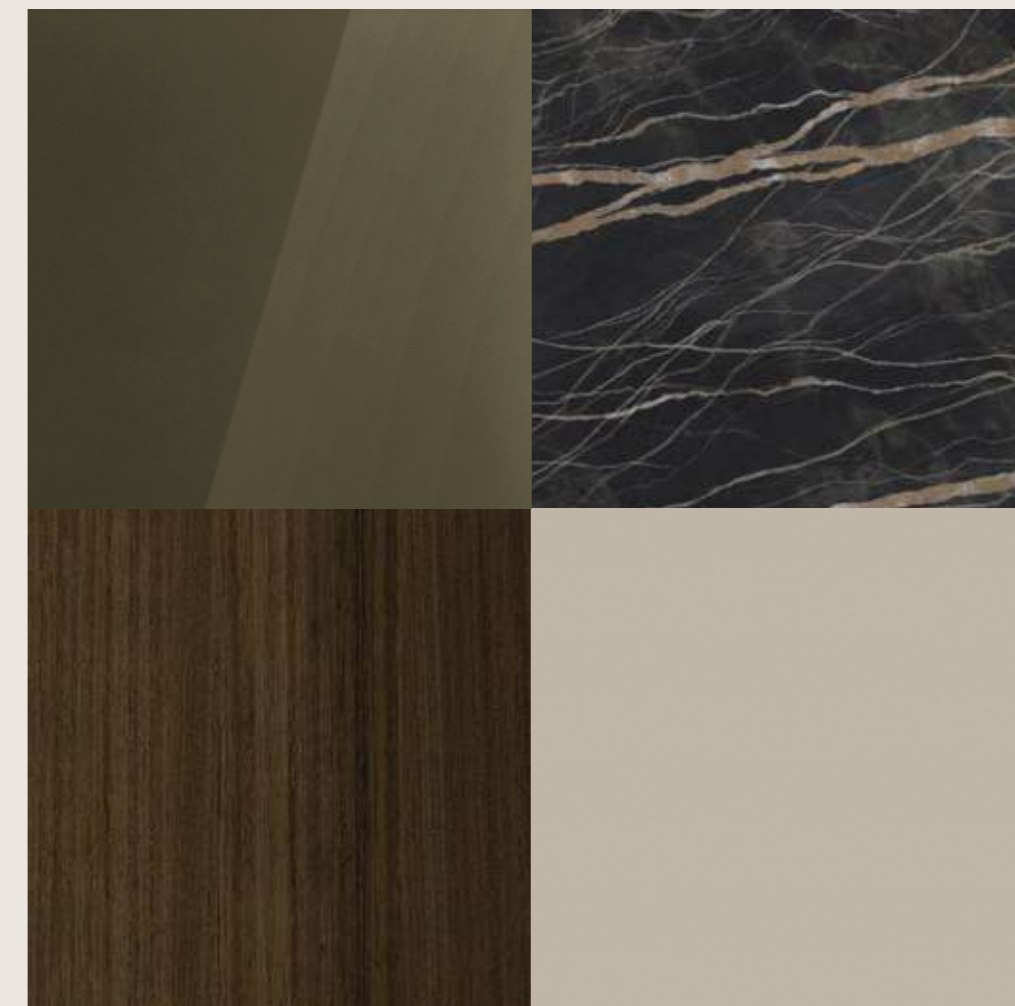

La couleur se structure et change notre façon de regarder l'espace; elle souligne les volumes, elle se complait à être remarquée.
